

Product Name :
Robot Kit Sound Sensor

Product Code :
ENGLABINGCAG2300006

Description :

Robot Kit Sound Sensor

Technical Specification :

A robot that makes use of two touch sensors to detect obstacles.
When its Antennal (Touch Sensor) detects an object in its path, it will go backward first and automatically follow a two-step manoeuvre to overcome the obstacle.
The step can be a combination of Right, Left, Reverse or Stop.
The robot can be configured for different set of movements.
