

Product Name :
Corollis Component of Acceleration Apparatus

Product Code :
ENGLABINGCAG3200003

Description :

Corollis Component of Acceleration Apparatus

Technical Specification :

FEATURES:

The equipment's is self contained, water re-circulating, provided with its own speed control unit and water-circulating pump.

Coriolis components of Acceleration can be determined at various speeds of rotation at water flow rates.

SPECIFICATION:

Water Tank: Made of Stainless Steel

Rotating Arms: 9mm/6mm orifice diameter, Length 300 mm.

Rota meter: 250 to 2500 LPH

Electric Motor: Swinging field, Variable speed.

Pump: FHP for water circulation.

The whole set-up is ingeniously designed and schematically arranged on a powder-coated rigid structure

Required for operation :

Water supply and drain

230V, 50Hz, 1 phase

230V, 60Hz, 1 phase; 120V, 60Hz, 1 phase

Engineering Lab Equipment India
