

**Product Name :**  
Corollis Component of Acceleration Apparatus

**Product Code :**  
ENGLABINGCAG3200003

**Description :**

Corollis Component of Acceleration Apparatus

**Technical Specification :**

**FEATURES:**

The equipment's is self contained, water re-circulating, provided with its own speed control unit and water-circulating pump.

Coriolis components of Acceleration can be determined at various speeds of rotation at water flow rates.

**SPECIFICATION:**

Water Tank: Made of Stainless Steel

Rotating Arms: 9mm/6mm orifice diameter, Length 300 mm.

Rota meter: 250 to 2500 LPH

Electric Motor: Swinging field, Variable speed.

Pump: FHP for water circulation.

The whole set-up is ingeniously designed and schematically arranged on a powder-coated rigid structure

**Required for operation :**

Water supply and drain

230V, 50Hz, 1 phase

230V, 60Hz, 1 phase; 120V, 60Hz, 1 phase
