

**Product Name :**  
Mortar Penetrometer

**Product Code :**  
ENGLABINGCAG3600076

**Description :**

Mortar Penetrometer

**Technical Specification :**

Mortar penetrometer for judging the strength and stability of concrete specimens of diversity.  
Mortar penetrometer is used for finding out the rate of hardening of mortar sieved from concrete spring and a stem graduated from 0-70 kg x 1 kg.  
6 interchangeable penetration needles of areas 645, 323 and 65 32 and 16 mm sq.  
Our penetration resistance is measured by the force exerted to penetrate the mortar by 25 mm and is indicated by a sliding ring on the stem, which is graduated.  
Needle shanks are marked at every 12.5 mm.  
The Mortar penetrometer is used for the purpose of ascertaining the rate of mortar component's hardening of the freshly mixed concrete.  
Supplied complete in a wooden carrying case.
