Product Name :
Commercial Refrigeration Unit With Fault Simulation

Product Code :
ENGLABINGCAG7800013

Description :

Commercial Refrigeration Unit With Fault Simulation

Technical Specification :

Selection of cooling stage via solenoid valves
Individual and parallel operation of the cooling stages possible
Cooling stages: insulated chambers with air-cooled evaporators
Semi-hermetic piston compressor, air-cooled condenser
All fans are speed-controlled
Mobile refrigeration unit with normal cooling stage and deep-freezing stage
Built in faults set module.

Engineering Lab Equipment India
