Product Name :
Scotch Yoke Mechanism

Product Code :
ENGLABINGCAG8400013

Description :

Scotch Yoke Mechanism

Technical Specification :

The unit is a bench top-unit with an anodized aluminum profile structure, and painted steel panel.
The main metallic elements are made of anodized aluminum.

This unit is composed of:

A rotary element (crank) with a graduated disc to read the angle.

A piston with a millimeter scale to measure the linear motion.

A vertical pivot links the rotary element (crank) and the piston.
